HENRY C. L. ANDERSON,

Director.

MEMORANDA.

Population.—The estimated population of New South Wales on 31st December, 1906, was 1,530,940. This shows an increase for the year of 34,890, or at the rate of 2·33 per cent. The birth-rate, 27·01 per 1,000 of population, showed a slight recovery, and the death-rate, 9·91 per 1,000 was the lowest on record.

Trade.—The imports during February were valued at £3,019,740, which shows the large increase of £654,509, as compared with the corresponding month of last year. For the first two months there was an increase of £1,879,520, as compared with last year. The direct oversea imports during February amounted to £1,625,635, as compared with £1,307,032 in 1906. There were increases in all the principal articles, more especially in apparel and soft goods, animals, metal manufactures, machinery, and gold. There was a falling-off in tobacco and sugar.

The oversea exports for February amounted to £3,193,924, and also show an increase of £22,427, compared with the corresponding month of last year. For the first two months there was an increase in the oversea exports of £940,177. Most of the principal articles show slight increases, the highest being exhibited by copper, wheat, and wool, but gold and tin showed a falling-off.

Banks.—The banking averages for the quarter ended 31st December, 1906, show that the deposits, which have continued to grow, exceeded the advances by £5,004,896. Compared with the corresponding quarter of 1905, deposits were £2,349,437 greater, reserves of coin and bullion were £1,315,897 less, and advances were £1,967,938 greater.

Railways.—The report on railways for the quarter ended 31st December, shows very satisfactory results. Compared with the corresponding quarter of last year, the earnings show an increase of £139,570, and the expenditure an increase of only £22,714, the net result being an improvement of £116,856. There was an improvement in all classes of traffic. Relatively, the earnings increased by 4½d. per train mile, and the expenditure decreased by 1½d. per train mile.

Mineral Production, 1906.—The value of the minerals won in New South Wales during 1906 was £7,912,716, there being the large increase of £1,015,635 over the value for 1905. To the total gold contributed £1,078,866, which was lower than in 1905; silver and silver-lead, £2,862,973, the largest value since 1893; coal, £2,337,227; and copper, £789,527, both the largest on record. The largest increases during the year were shown in silver-lead, coal, and copper.

Prices.—The general index number for February was slightly higher than in January, and considerably higher than in any February of the last six years. The index number for pastoral produce was 1,418, for metals 1,619, and for all articles 1,377. Prices generally were about the same as in January, but lead and tin are still rising.

Meteorology.—During February the rainfall was fairly general throughout the State, and, on the whole, was above the average.

Statistical Bulletin—February, 1907.
